Dear customer,

thank you for choosing fitness equipment from cardiostrong[®]. cardiostrong offers high-quality home fitness equipment that is optimally adapted to the conditions at home. Train at home no matter what the weather or time of the day. cardiostrong fitness equipment offers training programmes and a variety of equipment for all training levels and all training goals.

Further information can be found at www.fitshop.com or www.cardiostrong.de. We hope you enjoy your training!

Intended Use

The equipment may only be used for its intended purpose.

The equipment is suitable for home use and semi-professional use (e.g. hospitals, clubs, hotels, schools, etc.). The equipment is not suitable for commercial or professional use (e.g. fitness studio).

Product and manual are subject to change. Technical data can be changed without advance notice.

ABOUT THIS MANUAL

Please carefully read the entire manual before installation and first use. The manual will help you to quickly set up the system and explains how to safely use it. Make sure that all persons exercising with the equipment (especially children and persons with physical, sensory, mental or motor disabilities) are informed about this manual and its contents in advance. In case of doubt, responsible persons must supervise the use of the equipment.

Due to ongoing changes and software optimisations, the manual may have to be updated. If you notice any discrepancies during assembly or use, please refer to the manual uploaded to the webshop. The latest manual is always available there.

This equipment has been manufactured according to the latest safety knowledge. As far as possible, potential safety hazards which could cause injury have been eliminated. Make sure to carefully follow the instructions and that all parts are securely in place. If required, read through the instructions again to correct any mistakes.

Training devices must be classified according to accuracy and use. Accuracy classes are only applicable to devices that display training data.

Accuracy classes

Class A: high accuracy. Class B: medium accuracy. Class C: low accuracy.

The use classes explain the intended use of the training device.

Use classes

Class S (studio): professional and/or commercial use.

These training devices are intended for the use in training rooms of facilities such as sports clubs, school facilities, hotels, clubs and studios whose access and supervision is specifically regulated by the owner (person with legal responsibility).

Class H (home use): use at home.

These stationary training devices are intended for the use in private homes where access to the training device is regulated by the owner (person with legal responsibility).

BALTIC PRO

Please pay close attention to the safety and maintenance instructions given here. The contract partner cannot be held liable for damage to health, accidents or damage to the equipment when it is not used in accordance with these instructions.

The following safety instructions may appear in this manual:

► ATTENTION

This notice indicates potentially hazardous situations which, if not avoided, may result in property damage.

This notice indicates potentially hazardous situations which, if not avoided, may result in slight or minor injuries!

WARNING

This notice indicates potentially hazardous situations which, if not avoided, may result in death or serious injuries!

DANGER

This notice indicates potentially hazardous situations which, if not avoided, will result in death or serious injuries!

(i) NOTICE

This notice indicates further useful information.

Retain these instructions in a safe place for future reference, maintenance or when ordering replacement parts.

BALTIC PRO

1.2 Personal Safety

A DANGER

- + Before you start using the equipment, you should consult your physician that this type of exercise is suitable for you from a health perspective. Particularly affected are persons who: have a hereditary disposition to high blood pressure or heart disease, are over the age of 45, smoke, have high cholesterol values, are overweight and/or have not exercised regularly in the past year. If you are under medical treatment that affects your heart rate, medical advice is absolutely essential.
- + Note that excessive training can seriously endanger your health. Please also note that heart rate monitoring systems can be inaccurate. If you notice any signs of weakness, nausea, dizziness, pain, shortness of breath, or other abnormal symptoms, stop exercising immediately and seek advice from your doctor if necessary.
- + The owner must communicate all warnings and instructions to the user.

MARNING

- + This equipment may not be used by children under the age of 14.
- + Children should not be allowed unsupervised access to the equipment.
- + Persons with disabilities must have a medical license and must be under strict observation when using the equipment.
- + The equipment is strictly for use by one person at a time.
- + If your equipment provides a safety key, the clip of the safety key must be attached to your clothing before starting your training. In the event of a fall, the EMERGENCY STOP of the equipment can be initiated.
- + Keep your hands, feet and other body parts, hair, clothing, jewellery and other objects well clear of moving parts.
- + During use, wear suitable sports clothing rather than loose or baggy clothing. When wearing sports shoes, make sure they have suitable soles, preferably made of rubber or other non-slip materials. Shoes with heels, leather soles, studs or spikes are unsuitable. Never exercise barefoot.

- + If your equipment needs to be connected to the power supply with a mains cable, make sure that the cable is not a potential tripping hazard.
- + Make sure that nobody is within the range of motion of the equipment during training so as not to endanger you or other persons.
- + Be aware that if adjustment devices are left protruding, they may impede the user's movement.

► ATTENTION

+ Do not insert any objects of any kind into the openings of the device.

1.3 Set-Up Place

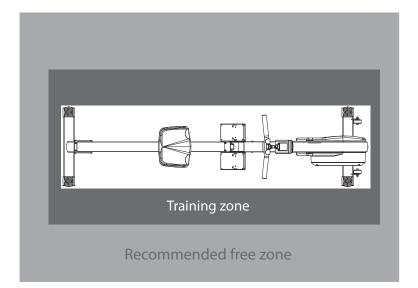

MARNING

+ Do not place the equipment in main corridors or escape routes.

- + Choose a location in which to place the equipment such that there is enough free space/ clearance to the front, the rear and to the sides of the equipment. Make sure that you leave at least 30 cm on each side of the equipment and at least 15 cm in front of and behind the equipment as a training zone. This is the minimum required area in order to safely use the equipment. The recommended free zone around the equipment should be at least 60 cm on each side and 45 cm in front of and behind the equipment.
- + The training room should be well ventilated during training and not be exposed to any draughts.
- + Choose the place in which to set up the equipment such that there is enough free space/ clearance to the front, the rear and to the sides of the equipment.
- + The set-up and mounting surface of the equipment should be flat, loadable and solid.

ATTENTION

- + The device may only be used in one building, in sufficiently tempered and dry rooms (ambient temperatures between 10°C and 35°C). The equipment should not be used outdoors or in rooms with high humidity (over 70%) like swimming pools.
- + A floor protective mat/equipment underlay can help to protect high-quality floor coverings (parquet, laminate, cork, carpets) from dents and sweat and can help to level out slight unevenness.
- + For Class S equipment, the exercise equipment may only be used in areas where access, supervision and control are specifically regulated by the owner.

BALTIC PRO

2.1 General Instructions

DANGER

+ Do not leave any tools, packaging materials such as foils or small parts lying around, as otherwise there is a danger of suffocation for children. Keep children away from the equipment during assembly.

MARNING

+ Pay attention to the instructions attached to the equipment in order to reduce the risk of injuries.

- + Ensure to have sufficient room for movement in each direction during assembly.
- + The assembly of the equipment must be carried out by at least two adults. If in doubt, seek the help of a third technically skilled person.

ATTENTION

+ To prevent damage to the equipment and the floor, assemble the equipment on a mat or packaging board.

i NOTICE

- + In order to make the assembly as simple as possible, some screws and nuts to be used can already be pre-assembled.
- + Ideally, assemble the equipment at its later set-up place.

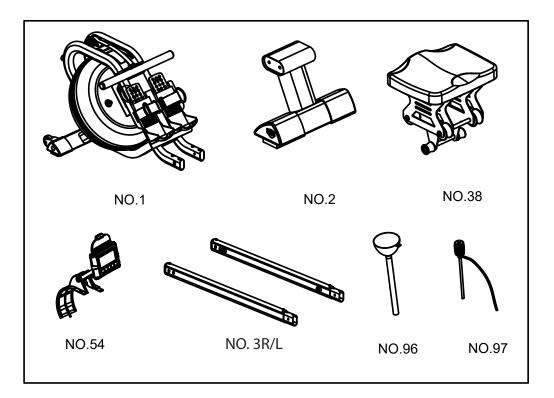

2.2 Scope of Delivery

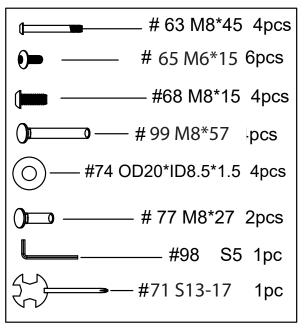

The scope of delivery consist of the following parts. At the beginning, check whether all parts and tools belonging to the device are included in the scope of delivery and whether damage has occurred. In the event of complaints, the contractual partner must be contacted directly.

If parts of the scope of delivery are missing or damaged, the assembly must not be carried out.

i NOTICE

Batteries are not included in the scope of delivery. The following batteries are required: 4x AA

BALTIC PRO

2.3 Assembly

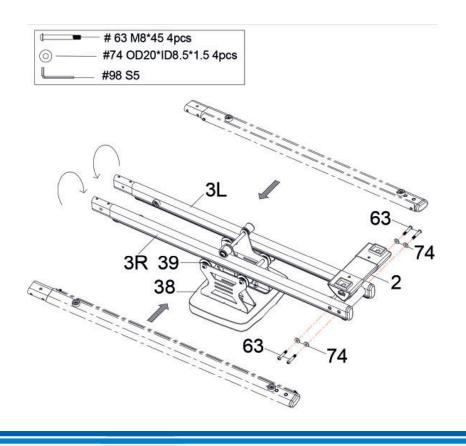

Before assembly, take a close look at the individual assembly steps shown and carry out the assembly in the order given.

- **i** NOTICE
 - + First loosely screw all parts together and check that they fit properly. Tighten the screws using the tool only when you are instructed to do so.
 - + If you have difficulty recognising the graphics, we recommend that you open and/or download the PDF instructions stored in the webshop on your end device (e.g. smartphone, tablet or PC). There you have the option of zooming in closer. Please note that the Adobe Acrobat Reader programme must be installed on your end device in order
 - The assembly can also be found as a video under the following link: https://www.sport-tiedje.co.uk/cardiostrong-rowing-machine-baltic-rower-pro-cst-brpro#product-assembly. To go directly to the assembly video, you can alternatively scan the QR-code.

Step 1: Assemble the slide rails

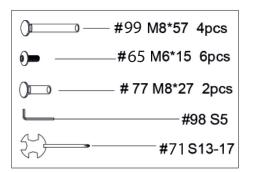

- 1. Place the seat on the floor with the rollers pointing upwards.
- 2. Place the slide rails (3L/R) with the aluminium plate downwards on the rollers of the seat (39) and turn the slide rails (3L/R) in the direction of the arrow and make sure that the aluminium plates touch the rollers.
- 3. Mount the rear stand (2) to the slide rails (3L/R) using four washers (74) and four screws (63).
- 4. Tighten the screws.

Step 2: Connect the slide rails to the main frame

- 1. Place the main frame (1) upright.
- Mount the slide rail (3L/R) to the frame (1) with four screws (99) on the top/seat side, two screws (77) on the outside and six screws (65) on the bottom.
- 3. Tighten the screws.

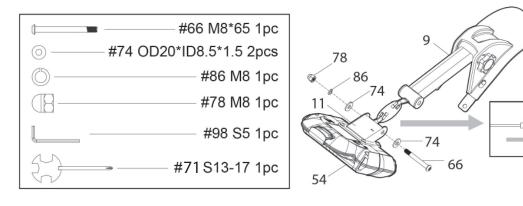

Step 3: Assembly of the console Part 1

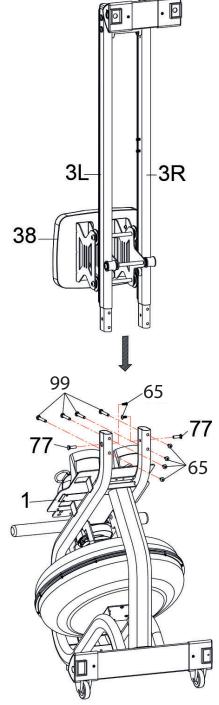

- 1. Loosen and remove the bolt (66), washers (74), spring washer (86) and nut (78) pre-mounted on the console holder (9).
- 2. Connect the cables of the console (54) to their corresponding counterparts of the console holder (9).
- 3. Insert the excess cable into the console holder (9).

► ATTENTION

Be careful not to pinch the cables during the following step.

4. Secure the console (54) to the console holder (9) with the previously loosened bolt (66), washers (74), spring washer (86) and lock nut (78).

TF (ml

BALTIC PRO

Step 4: Assembly of the console Part 2

1. Insert to AA batteries (1.5V) into the battery compartment of the console (54).

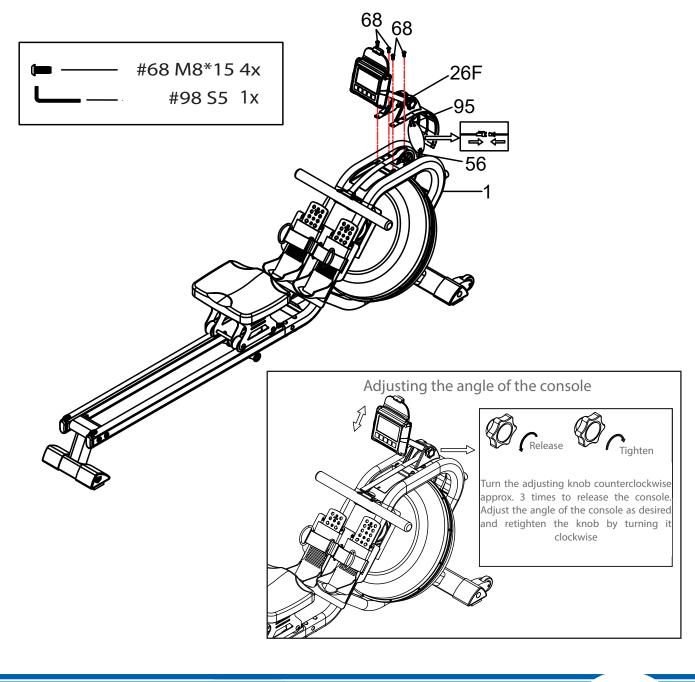

i NOTICE

LCD display lights up for two seconds after the batteries are inserted. Then the intensity level (water level 1-6) must be specified (see chapter 2.4.2).

► ATTENTION

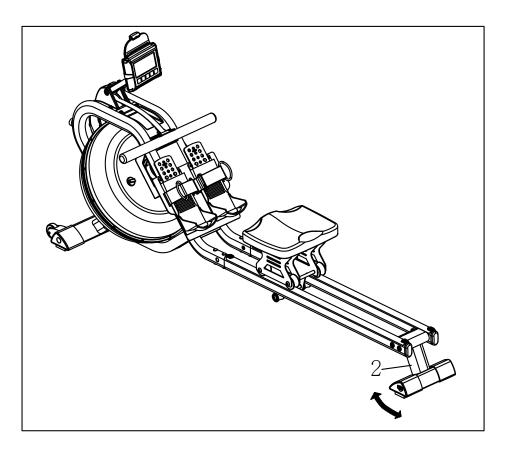

Make sure not to pinch the cables during the next step.

- 2. Place the main frame (1) back down and connect the sensor wire (56) with the connection wire (95) and insert the remaining cable into the main frame (1).
- 3. Place the cover (26) into the recess of the main frame (1).
- 4. Mount the console (54) to the main frame (1) with four screws (68).

Step 5: Alignment of the feet

If the ground is uneven, you can stabilise the rowing machine by turning the two adjustable end caps (19) on the rear stand (2).

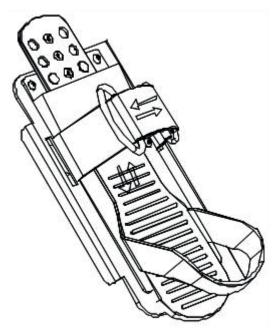

2.4 Adjustment of the rowing machine

2.4.1 Adjustment of heel rest and strap

There are several settings for the heel rest. Before you start with your training, adjust the heel rests correctly.

- 1. Loosen the strap by opening the Velcro fastener and place your foot on the heel rest through the strap.
- 2. Tighten the strap of the heel rest so far upwards that your heel is supported and the foot strap lies over the widest part of your foot.
- 3. Tighten the strap at the loosened end of the Velcro fastener and press the Velcro fastener back on.

BALTIC PRO

2.4.2 Fill and empty the tank

+ The water inside the tank must not be drunk and must be disposed of after use.

► ATTENTION

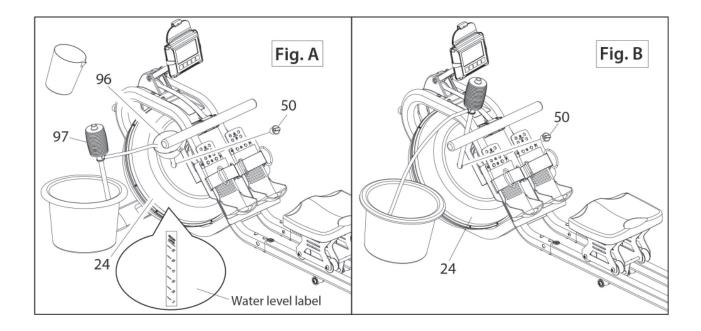

- + Fill the tank only with tap water. Do not use distilled water.
- + Do not fill the water tank above the maximum capacity, this may void the warranty. The maximum filling quantity can be found in the section on the water level in this chapter.
- + To prevent algae formation, limescale and possible damage to the tank, we recommend the use of chlorine tablets. Only use chlorine tablets for rowing machines.
- 1. Remove the fill plug (50) from the upper tank (24).
- 2. Filling: Place the funnel (96) in the tank opening and fill the tank using the pumping siphon (97) or a measuring cup and a bucket (see figure A).
- 3. Emptying: Place a bucket next to the rowing machine and pump the water with the pumping siphon (97) from the tank into the bucket (see fig. B).
- 4. After filling or emptying the tank, insert the fill plug (50) into the tank (24) and wipe off excess water from the frame.

Water level

The water level indicator is located on the top of the tank (see Fig. A). The minimum level for filling is 1, the maximum level 6.

The resistance is determined by the amount of water in the tank.

Example: level 2 for light resistance, level 6 for highest resistance.

3 OPERATING INSTRUCTIONS

i NOTICE

- + Familiarise yourself with all the functions and setting options of the device before starting training. Have the proper use of this product explained to you by a specialist.
- + Always start your training with low intensity and increase evenly and gently. End your training with a cool-down phase. If you are unsure, please consult your physician.

3.1 Console Display

TIME	 + Display of training time. + Set target time with UP and DOWN buttons (0:00 - 99:00). 1 minute steps.
TIME/500M	Your average 500 m time is automatically displayed and permanently updated.
SPM	Strokes per minute.
DISTANCE	 + Display of the Distance. + Set the target distance with the UP and DOWN buttons (0 - 99900 m). 100 metre steps.
STROKES	 + Display of current strokes. + Set the target value with the UP and DOWN buttons (0 - 9990 strokes). Steps of 10 strokes.

BALTIC PRO

TOTAL STROKES	Counts total strokes.
CALORIES	 + Display of consumed calories. + Set calorie target value with the UP and DOWN buttons (0 - 9990). Steps of 10 calories.
PULSE	 + Display of heart rate. + Set target value with UP and DOWN buttons (30 - 240). Steps of 1. (i) NOTICE The heart rate is measured only with a chest strap.
DRAG FORCE	Display of the current drag force.
WATT	Display of the Watts.

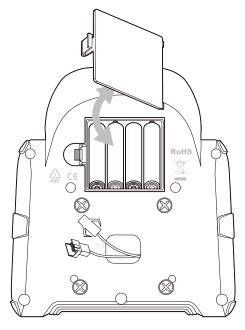

3.2 Button Function

RESET	Return to the main menu.
START / STOP	Start or interrupt the selected training programme.
ENTER	 + Confirm programme selection or setting values. + Press during the training, to switch between the displayed function values.
UPX/ DOWNX	+ Select settings/values.+ Increase or decrease function value.

3.3 Battery Compartment

The console is powered by four AA 1.5V batteries. In case the console is not working properly, the batteries might be running low. Follow the instructions to exchange the batteries.

- 1. Open the battery compartment cover and remove the batteries.
- 2. Insert four new AA 1.5V batteries and close the cover again.

3.4 Switch on the Device

After inserting the batteries (four AA-batteries), a sound beeps for 2 seconds, the console will switch on and displays the type (Fig. 1&2). The console has now entered the intensity level selection (Fig. 3). The intensity level depends on the water level in the tank.

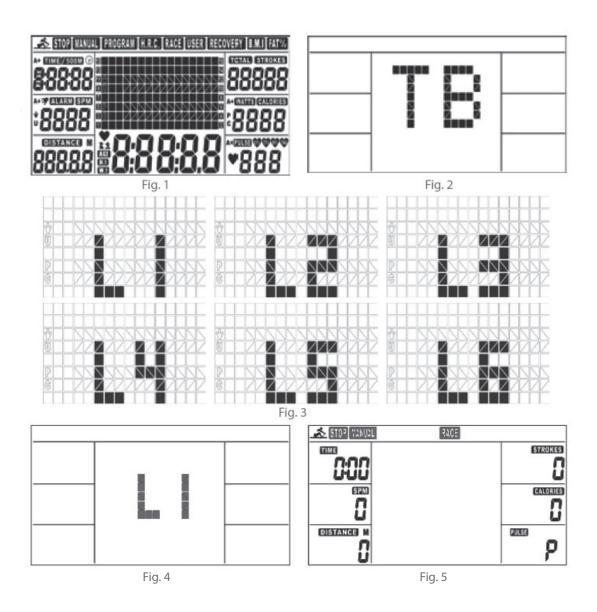

To set the level (L1 - L6, standard value is L1, Fig. 3&4, press the \square or \square keys and confirm the entry with the ENTER key.

The console enters the training mode (Fig. 5).

i NOTICE

This procedure must be carried out after each battery change or reset of the console.

To switch on the console in regular use, press any key or pull the handle.

BALTIC PRO

3.5 Standby Mode

After four minutes of no input or training movement, the console enters the standby mode. To exit standby mode, start the training or press any key.

3.6 Programmes

The following programmes are available:

+ Manual programmes: 5+ Race programme: 1

3.6.1 Manual Programme

In the manual mode (MANUAL) you can either start training directly by pressing the START/STOP key or set target values for distance, strokes, calories, heart rate and time.

Your training equipment is not a medical device. The heart rate measurement of this equipment may be inaccurate. Various factors can affect the accuracy of the heart rate measurement. The heart rate measurement serves only as a training aid.

- 1. Select MANUAL in the training mode (Fig. 6).
- 2. Press the ENTER key to confirm.
- 3. To set target values, press \square and confirm with the ENTER key.
- **i** NOTICE

If you have set a target value for time, no target value can be set for distance and vice versa.

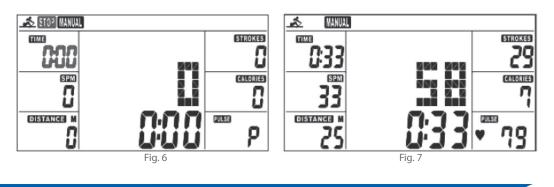

- 4. To set further target values, press 🛛 again and confirm the respective entries with the ENTER key.
- 5. To start the training, press the START/STOP key.

The programme starts.

The drag force is displayed in the matrix.

Set target values will be counted down, the remaining values will be counted up (Fig. 7).

The programme ends when you reach one of the target values or press the START/STOP key.

3.6.2 Race Programme

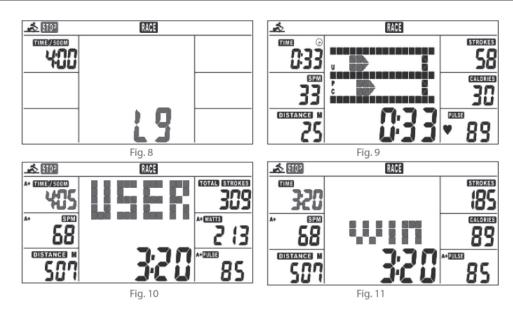

- 1. To select the race programme, select RACE in the training mode.
- 2. Press the ENTER key to confirm.

You are now in the selection menu to select between the racing programmes L1 - L15.

i NOTICE

Only the distance can be set in the race programme. The time per 500m is preset. The times are given in the table below:

L	_1	L2	L3	L4	L5	L6	L7	L8	L9	L10	L11	L12	L13	L14	L15
8	3:00	7:30	7:00	6:30	6:00	5:30	5:00	4:30	4:00	3:30	3:00	2:30	2:00	1:30	1:00

3. Confirm the selection (L1 - L15) with the ENTER key (Fig. 8).

The distance value is blinking.

- 4. To set the distance, press \boxtimes or \boxtimes and confirm with ENTER.
- 5. To start the race, press the START/STOP key.

The race starts (Fig. 9).

As soon as you or the PC reaches the finish, the programme stops and displays the winner (Fig. 10&11).

BALTIC PRO

(i) NOTICE

Press the ENTER key to change the displayed function values:

- + TIME -> TIME/500M A+
- + SPM -> SPM A+
- + TOTAL STROKES -> STROKES
- + CALORIES -> WATT A+
- + PULSE -> PULSE A+

3.7 Wireless technology and fitness apps

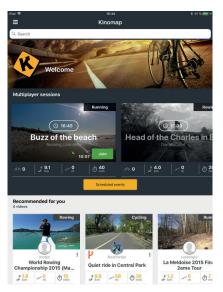

This console is equipped with a wireless technology interface. To use training apps you will have to connect your equipment with your mobile device (tablet or smart phone). To do this, please activate the wireless technology function on your mobile device. Now choose your equipment.

Please take note that your mobile device needs to be compatible with the wireless technology interface of the rowing machine (4.0). Now start the fitness app. It might happen that you need to connect both the app and the console additionally. To do this, please follow the instructions given in the app.

You will find the fitness apps in the app stores of Google or Apple. There you will find the apps "Kinomap" or "iconsole+". Please note that these apps are produced by an external manufacturer. Fitshop does not take any responsibility regarding the availability, functionality or contents of these programmes.

Example: Kinomap

3.8 Notes on correct rowing

Body moves towards the handle

Wrong

At the end of the movement, the body will be pulled forwards towards the handles instead the handles to the body.

Right

At the end of the movement, the user slightly leans back, holds the legs down, keeps the upper body straight and pulls the handle to the body.

Straddled elbows

Wrong

The user's elbows are straddled from the body at the end of the movement and the handle is at the height of the breast.

Right

Pull the handle to the body with straight wrists and the elbows close to the body. The elbows are brought behind the head while the handle is pulled to your waist.

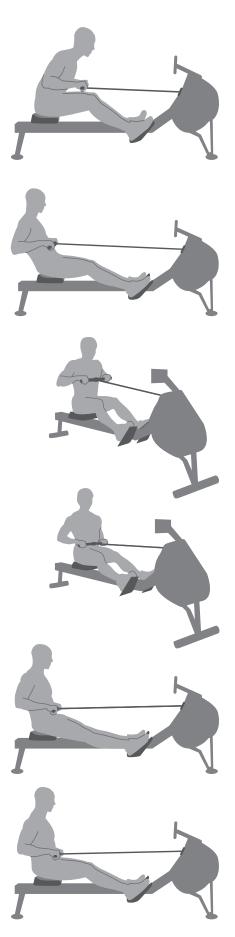

Do not completely extend

Wrong

At the end of the movement, the user completely stretches the leg and knee.

Right

Keep your knee slightly bent at all times even at the end of the movement instead of stretching it completely.

BALTIC PRO

Leaning too far forward

Wrong

The body is bent too far forward. The shins are no longer vertical. The head and shoulders are facing the feet. The body is therefore in a weak position to execute the movement.

Right

The shins are vertical. The body is pressed against the legs, the arms are completely stretched out in front and the body is slight bent forward. This position should be pleasant.

Rowing with bent arms

Wrong

The user begins the movement with the arms instead of first pressing with the legs.

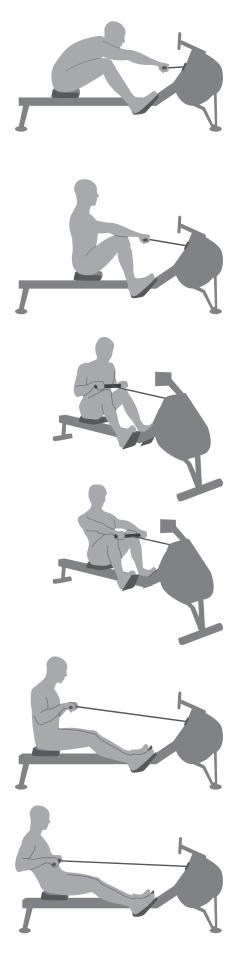

Right

The user begins by stretching out the legs, relaxing the back and stretching the arms.

Bent wrists

Wrong The user bents the wrists during the movement.

Right Always execute the rowing movement with straight wrists.

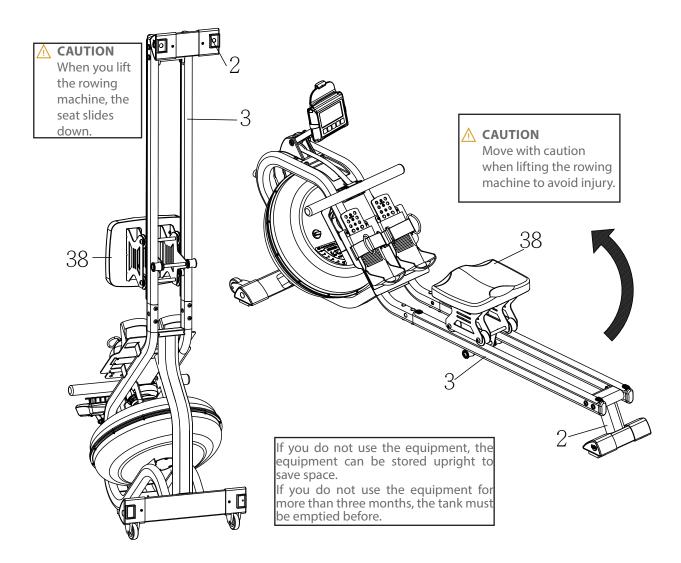

4.1 General Instructions

ATTENTION

+ Make sure that the equipment is protected from moisture, dust and dirt in the selected storage location. The storage location should be dry and well ventilated and have a constant ambient temperature between 5°C and 45°C.

WARNING

- + The storage location should be chosen so that improper use by third parties or children can be prevented.
- + If your equipment does not have transportation wheels, the equipment must be disassembled before transportation.

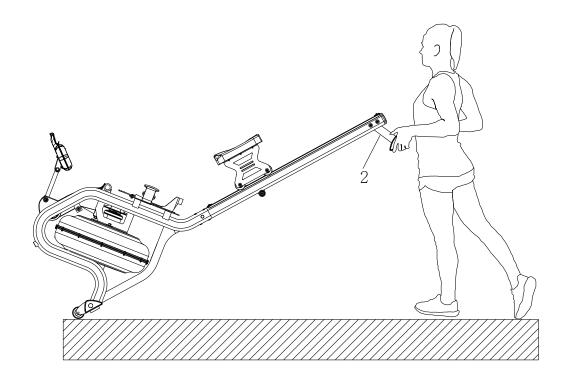

BALTIC PRO

4.2 Transportation Wheels

► ATTENTION

If you want to transport your equipment over particularly sensitive and soft floor coverings, such as parquet, planks or laminate, lay out the transport route with cardboard or similar to avoid possible floor damage.

- 1. Stand behind the equipment and lift it until the weight is transferred to the transportation wheels. After that, you easily can move the equipment to a new position. For long transport distances the equipment should be disassembled and safely packed.
- 2. Select the new location by following the instructions in the section 1.3 of this manual.

5.1 General Instructions

MARNING

+ Do not make any improper changes to the equipment.

CAUTION

+ Damaged or worn components may affect your safety and the life of the equipment. Therefore, immediately replace damaged or worn components. In such a case, contact the contract partner. The equipment must not be used until it has been repaired. If necessary, use only original spare parts.

► ATTENTION

+ In addition to the instructions and recommendations for maintenance and care given here, additional service and/or repair work may be necessary; this must only be carried out by authorised service technicians.

5.2 Faults and Fault Diagnosis

The equipment undergoes regular quality controls during production. Nevertheless, faults or malfunctions may occur. Frequently, individual parts are responsible for these disturbances, an exchange is usually sufficient. Please refer to the following overview for the most common errors and how to correct them. If the equipment still does not function properly, contact your contract partner.

Fault	Cause	Solution
Display is blank/is not working	Batteries empty or loose cable connection	Replace batteries or check cable connections
Creaking noises	Screw connections loosened or too tight	Check screw connections
Grinding noises on the guide rail	Guide rail or rollers dirty or guide rail dry	Clean the guide rail and then lubricate it with a suitable lubricant
No pulse display	 + Sources of interference in the room + unsuitable chest strap + Wrong position of chest strap + Chest strap defective or battery empty + Pulse display defective 	 + Eliminate sources of interference (e.g. mobile phone, WLAN, lawn mower and vacuum cleaner robot, etc) + Use a suitable chest strap (see RECOMMENDED ACCESSORIES). + Reposition chest strap and/or moisten electrodes + Changing batteries

BALTIC PRO

5.3 Maintenance and Inspection Calendar

To avoid damage from body sweat, the equipment must be cleaned with a damp towel (no solvents!) after each training session.

The following routine tasks must be performed at the specified intervals:

Part	Weekly	Monthly	Half-yearly			
Display console	С	I				
Cleaning and lubricating slide rail and moving parts*		C/I				
Plastic covers	С	I				
Screws and cable connections		I				
Water colour/Chlorine**			I			
Legend: C = clean; I = inspect						

*Make sure to always clean the slide rails and moving parts before re-lubricating.

** To avoid algae formation and deposits in the tank, chlorine tablets must be used regularly. This should be done approx. every 3-6 months and depends, among other things, on the direct sunlight. In general, the brighter the set-up location, the more frequently you must put a chlorine tablet into the tank. The water does not need to be changed.

Water colour for rowing machines can be purchased as an optional accessory to colour the water in the water tank. Please note that the water colour already contains chlorine. Therefore, do not use water colour with additional chlorine tablets, as these neutralise the colour.

6 DISPOSAL

At the end of its operational life, this equipment cannot be disposed of in normal household waste. Instead, it must be disposed of via an electricals recycling centre. Further information can be obtained from your local authority's recycling service.

The materials can be recycled as per their symbols. Through the reuse, recycling of materials or other forms of recovery of old equipment, you make an important contribution to the protection of the environment.

7 RECOMMENDED ACCESSORIES

To make your training experience even more efficient and pleasant, we recommend that you add suiting accessories to your fitness equipment. For rowing machines this could for example be a **floor mat**, which makes your fitness equipment stand more securely and also protects the floor from sweat or **silicone spray** to keep moving parts in good shape. We also recommend the use of **rowing gloves**. For rowing machines with water resistance, be sure to purchase chlorine tablets.

If you have purchased a fitness machine with pulse training and want to train your heart rate, we strongly recommend that you use a compatible **chest strap**, as this ensures optimum transmission of the heart rate.

BALTIC PRO

Our range of accessories offers the highest quality and makes training even better. If you would like to find out more about compatible accessories, please go to the detail page of the product in our webshop (the easiest way is to enter the article number in the search field above) and go to the recommended accessories on this page. Alternatively, you can use the QR-code provided. Of course, you can also contact our customer service: by telephone, e-mail, in one of our branches or via our social media channels. We will be happy to advise you!

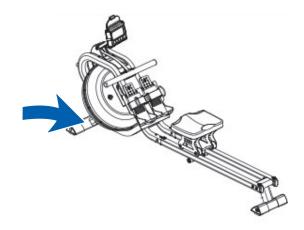

8 ORDERING SPARE PARTS

8.1 Serial Number and Model Name

In order to provide you with the best possible service, please have the model name, article number, serial number, exploded drawing and parts list ready. The corresponding contact options can be found in chapter 10 of this operating manual.

i NOTICE

The serial number of your equipment is unique. It's located on a white sticker. The exact position of this sticker is shown in the following illustration.

Enter the serial number in the appropriate field.

Serial number:

Brand / Category:

cardiostrong / rowing machine

Model Name:

Baltic Rower Pro

Article Number:

CST-BRPRO-B / CST-BRPRO-R

9 WARRANTY

Products from cardiostrong[®] are subject to strict quality control. However, if a fitness equipment purchased from us does not work perfectly, we take it very seriously and ask you to contact our customer service as indicated. We are happy to help you by phone via our service hotline.

Error Descriptions

Your fitness equipment is developed for long-term, high-quality training. However, should a problem arise, please first read the operating instructions. For further assistance, please contact your contract partner or call our service hotline. To ensure your problem is solved as quickly as possible, please describe the defect as exactly as possible.

In addition to the statutory warranty, we provide a warranty for every fitness equipment purchased from us according to the following provisions.

Your statutory rights are not affected.

Warrantee

The warrantee is the first/original buyer and/or any person who received a newly purchased product as a gift from the original buyer.

Warranty period

The warranty periods, shown on our web shop, begin on delivery of the fitness equipment. The respective warranty periods for your equipment can be found on its product website.

Repair Costs

According to our choice, there will either be a repair, a replacement of individual damaged parts or a complete replacement. Spare parts, that have to be mounted while assembling the equipment, have to be replaced by the warrantee personally and are not a part of repair. After the expiration of the warranty period, the responsibility for parts costs, repair costs, installation costs and delivery costs lies with the warranty holder.

The terms of use are defined as follows:

- + Home use: solely for private use in private households up to 3 hours per day
- + Semi-professional use: up to 6 hours per day (e. g. rehabilitation centres, hotels, clubs, company gyms)

BALTIC PRO

+ Professional use: more than 6 hours per day (e. g. commercial gyms)

Warranty Service

Within the warranty period, equipment which develops faults as a result of material or manufacturing defects, will be repaired or replaced at our discretion. Ownership of equipment or parts of equipment which have been replaced is transferred to us. The warranty period is not extended nor does a new warranty period begin following repair or replacement under the warranty.

Warranty Conditions

For the warranty to be valid, the following steps must be taken:

Please contact our customer service by email or phone. If the product under warranty has to be sent in for repair, the seller bears costs. After expiry of the warranty, the buyer bears the costs of transport and insurance. If the fault is covered by our warranty, you will receive a new or repaired equipment in return.

Warranty claims are invalid in case of damage resulting from:

- + misuse or improper handling
- + environmental influences (moisture, heat, electrical surge, dust, etc.)
- + failure to follow the current safety measures for the equipment
- + failure to follow the operating instructions
- + use of force (e. g. hitting, kicking, falling)
- + interventions which were not carried out by one of our authorized service centres
- + unauthorised repair attempts

Proof of Purchase and Serial Number

Please make sure that you are able to provide the appropriate receipt when claiming on your warranty. So that we can clearly identify the model of your equipment, and for the purposes of our quality control, you will need to give the serial number of your equipment, when contacting the service team. Where possible please have your serial number and your customer number ready when you call our service hotline. It will help us to deal with your request swiftly.

If you cannot find the serial number on your fitness equipment, our service team is at your disposal to offer further information.

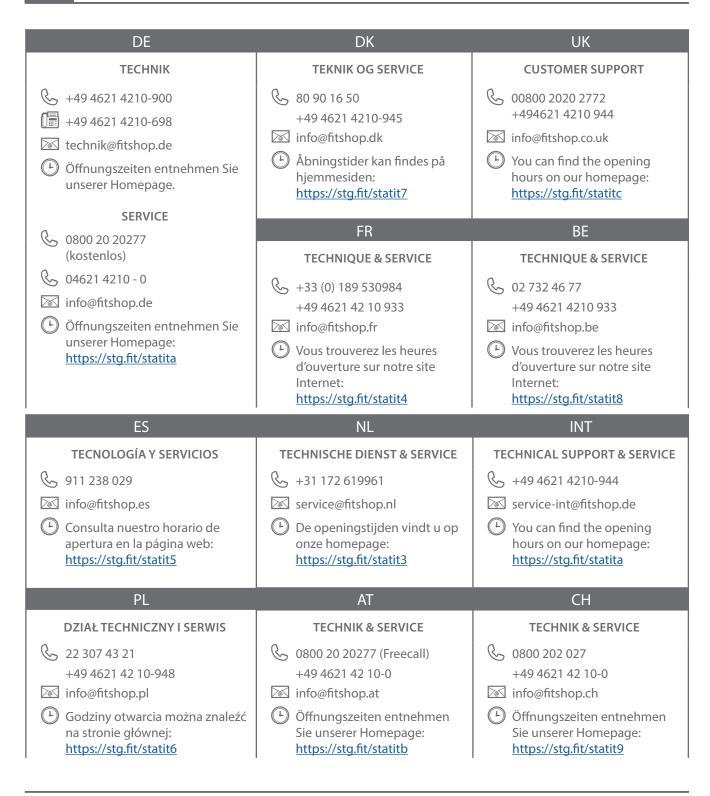

Service outside of the Warranty Period

We are also happy to issue an individual cost estimate if there is a problem with your fitness equipment after the warranty has expired, or in cases which do not fall under the terms of the warranty, e.g. normal wear and tear. Please contact our customer service team to find a quick and cost-effective solution to your problem. In such a case you will be responsible for the delivery costs.

Communication

Many problems can be solved just by speaking to us as your specialist supplier. We know how important it is to you as a user of the fitness equipment to have problems solved quickly and simply, so you can enjoy working out with minimal interruption. For that reason, we also want to resolve your queries quickly and in a straightforward manner. Thus, please always keep your customer number and the serial number of the faulty equipment handy.

10 CONTACT

Please find a detailed overview including address and opening hours for all stores of the Fitshop Group in Germany and abroad on the following website:

BALTIC PRO

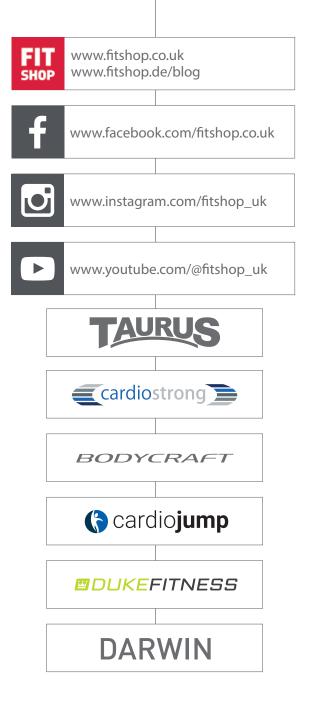

WE LIVE FITNESS

WEBSHOP AND SOCIAL MEDIA

Fitshop is Europe's largest specialist store for home fitness equipment with currently over 70 stores and one of the world's most renowned online mail order companies for fitness equipment. Private customers order via the 25 web shops in the respective national language or have their desired equpiment assembled on site. In addition, the company supplies fitness studios, hotels, sports clubs, companies and physio practices with professional equipment for endurance and strength training.

Fitshop offers a wide range of fitness equipment from renowned manufacturers, high-quality in-house developments and comprehensive services, such as a build-up service and sports scientific advice before and after the purchase. The company employs numerous sports scientists, fitness trainers and competitive athletes.

Visit us also on our social media platforms or our blog!
