USER MANUAL

Before You Start

- Read all instructions in this manual before assembling or using this equipment
- Remove all parts from the packaging and count each component separately to ensure everything is provided correctly, noting that some items may be pre-assembled
- Follow the instructions and refer to both the individual assembly pages and the exploded views of the equipment whenever possible
- The owner is responsible for ensuring that all users of this unit have read the user manual and understand the safety precautions
- Descriptions of left and right refer to the perspective of standing in front of the equipment
- Place all parts in a cleared area and remove the packing materials. Do not dispose of the packing materials until all assembly steps are completed
- Machines with a counterbalanced smith bar require up to one meter of clearance above the assembled height to insert the counterbalances. If there is not enough clearance, insert the counterbalances into the required framing components before assembly and securely anchor off the cables to ensure they can be retrieved and attached as needed
- It is recommended to keep these instructions

Safety Precautions

- It is highly recommended that two or more people are used for assembly
- Assemble equipment on a flat surface
- Consider placing a mat/mats under the equipment to protect your floor
- Only tighten nuts and bolts loosely until all equipment is assembled. Once the equipment is fully assembled each bolt can be tightened working evenly around the equipment where possible
- Ensure all parts are in working order prior to use
- Make sure all pivoting components are able to move freely
- Do not use or store the equipment outdoors or around water
- Do not over tighten any component with pivoting function
- Keep hair, fingers and clothing away from moving parts
- Only use attachments recommended by the manufacturer
- Never operate if parts are not functioning correctly
- Always stretch prior to using equipment
- Stop immediately if you experience any pain, dizziness or nausea
- Before starting any exercise program consult your doctor

FORCE USA TRAINING APP

The Force USA training app offers programs, tutorials, progress tracking and more. Not compatible with all Force USA equipment.

PREVENTATIVE MAINTENANCE

To ensure your equipment is operating at its peak, please follow the below preventative maintenance schedule performing all tasks upon initial assembly:

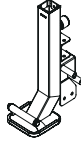

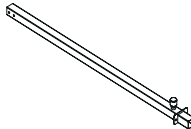

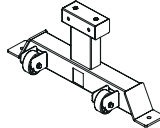

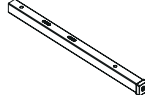

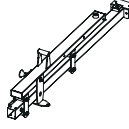

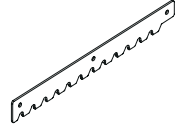

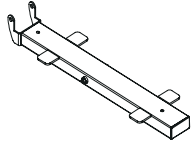

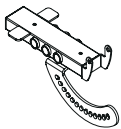

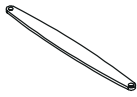

Daily Maintenance

- Wipe down the equipment to remove any dust and sweat residue with a dry, non-abrasive cloth
- Inspect the unit for noisy, damaged or loose components

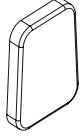

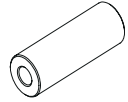

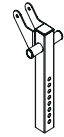

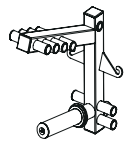

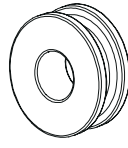

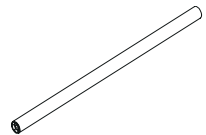

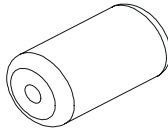

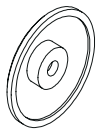

Monthly Maintenance

- Thoroughly clean the equipment using a non abrasive cloth dampened with a mild, all purpose cleaner ensuring to thoroughly wipe down and dry the equipment afterwards
- Apply a 100% silicone lubrication (preferably spray) to guide rods, pulley sliders, weight plate carriages and any other moving parts where friction can occur including bearings (where applicable). Any other form of lubrication will void your warranty
- Check the tightness of all bolts, nuts and screws
- Check the cables for fraying or any signs of wear and ensure they are at the correct tension with a small amount of slack at resting position (where applicable)
- Inspect pulleys for any damage or cracks (where applicable)
- Knurling can be cleaned using a soft bristled brush to help remove any particles that may be nestled within the knurling
- Vacuum around the machine/equipment to prevent dust acclimation

MEASURING FOR BOLT LENGTH

We believe success comes from striving to be better than yesterday. It comes from the urge to push boundaries and break through barriers. Fueled with the belief that everybody deserves a fit and healthy lifestyle, we are dedicated to providing innovative strength and fitness solutions to build stronger, happier and healthier lives.

WARRANTY

The Force USA range of strength equipment carries a Lifetime (10 Year) Structural Warranty along with two years cover on all moving parts and 90 days warranty on all upholstery items. This warranty applies to first owners and does not cover second-hand equipment or re-sold equipment. This Force USA warranty covers only failures due to defects in structural elements, cables and pulleys and workmanship that occur during regular use in the warranted environment. It will not cover damage that occurs in transport/delivery or failure due to misuse, abuse, neglect, misapplication, alteration or improper assembly of the product. The replacement or repair provided for under the Force USA warranty is the responsibility of the user, and the customer will be responsible for any freight charges that apply. Force USA will not be liable for any consequential damages or breach of any implied warranty on the range of Force USA strength equipment. Force USA reserves the right to provide reconditioned parts and/or to request a return and repair existing defective components on the Force USA product.
