

Redondo® Ball usage and care instructions

Congratulations on your purchase of the Redondo® Ball.

Having purchased the Redondo Ball you have chosen a TOGU® branded product which is “Made in Germany”!

It is made in conformity with the applicable EU regulations for sports equipment, contains no heavy metals and is made of 100% recyclable plastic.

Super soft but still robust.

Small – but indispensable. The foldable ball for MindBody, Pilates, Wellness and Fitness.

Inflating:

The Redondo Ball is delivered airless.

For inflating the Redondo Ball there is a drinking straw included in the package.

Do not inflate the Redondo Ball over the prescribed maximum diameter

Equipment details:

The Redondo Ball is made of high-quality Ruton and is fitted with a plug valve.

Measure: 18 cm, 22 cm, 26 cm diameter

Load capacity: approx. 120 kg

Thermal stability:

The Redondo Ball is UV-resistant and also heat-resistant to a limited degree. It can easily withstand temperatures of up to 45°C. However, the Redondo Ball should be kept out of direct sunlight (e.g. do not store in the window). The material softens as it gets warmer.

The Redondo Ball is also resistant to cold, but should nevertheless not be stored at temperatures below -10°C.

The material hardens as it gets colder.

Care:

Any mild standard cleaning agents and disinfectants can be used to clean the Redondo Ball. Solvent based, acidic or caustic cleaners will damage the material.

Hint:

Press your index finger next to the drinking straw during inflating, so that when pulling it out of the tube the escape of too much air can be prevented.
